

UNITED NATIONS FRAMEWORK FOR COOPERATION ON SUSTAINABLE DEVELOPMENT IN CHILE 2023-2026

[EXECUTIVE SUMMARY]

The comprehensive achievement of the 2030 Agenda for Sustainable Development (2030 Agenda) in Chile shows a mixed picture, with progress on various Sustainable Development Goals (SDGs) but with persistent and emerging challenges. Despite the country's high level of development, overcoming inequalities, addressing economic and territorial development, focusing on the age and gender gaps remain critical to continue progress towards the SDG agenda.

The United Nations Cooperation Framework for Sustainable Development 2023-2026 (Cooperation Framework) builds on the national development priorities to articulate an agenda based on rights, data analysis and integrated policy advice to accelerate the country's achievement of a sustainable, inclusive, and resilient development, leaving no one behind.

Leaving no one behind is achieved in the Cooperation Framework using an integrated approach that includes Human Rights, the gender perspective, territory, intersectionality, intergenerational vision, and intercultural perspective and responses.

The implementation and monitoring of the Cooperation Framework will be based on existing mechanisms with the Government of Chile through a Joint Committee that oversees the CF's implementation; a reference group that includes civil society as well as a monitoring system based on indicators reported in UNInfo to ensure accountability and transparency.

Governance and management structure

Joint Steering Committee, chaired by the Minister of Foreign Affairs and the Resident Coordinator of the UNS, and made up of the Ministries General Secretariat of the Presidency, Women's and Gender Equality, Economy, Environment, Social Development, and Family and Interior, as well as the agencies, funds, and programs (AFP) of the UNS.

I.II.

The Joint Technical Committee comprises technical focal points of the Joint Steering Committee.

III.

The Country Team is the highest inter-agency level for internal coordination, decision-making, and oversight of the UNS.

IV.

Four Results Groups, comprised of the AFPs involved in each strategic priority, are the interagency coordination mechanisms for the programmatic operation.

For the first time, the UNS will establish a space for dialogue with civil society to give voice and allow representatives of organizations and networks, groups in vulnerable situations, and territorial actors to listen to issues of interest. That impact the implementation and monitoring of the Cooperation Framework.

Four strategic priorities were defined to advance toward Sustainable Development, which addresses the challenges in a transversal manner with a perspective of Human Rights, gender, territorial development, and intersectionality, with an intergenerational vision and intercultural perspective.

Equality is Substantive in accessing and enjoying economic, social, cultural, and environmental rights.

EFFECTS

1.1 Access to and effectively enjoy ESCERs, poverty reduction, and closing inequality gaps.

1.2 Building a caring society with social protection and access to social services.

1.3 Approach to human mobility with an integrated system.

1.4 Quality, sustainable, resilient public education, food, and health systems.

Strengthened democratic institutionalism and security for a new inclusive social contract.

EFFECTS

2.1 Guarantee of civil and political rights and strengthening of mechanisms for dialogue and participation.

2.2 Strengthening democracy and transparency, gender parity, and territorial development.

2.3 Promotion for a peaceful and inclusive society, crime prevention, and access to justice.

Sustainable, inclusive, and resilient development model to address the climate crisis, biodiversity loss, and pollution.

EFFECTS

3.1 Sustainable, inclusive, and resilient production and consumption, with just socio-ecological transition, decent work, economic diversification, and financing.

3.2 Sustainable use of natural resources, restoration and conservation of ecosystems and biodiversity.

3.3 Climate change adaptation and mitigation, resilience and disaster and emergency management.

Gender Equality

EFFECTS

4.1 Mainstreaming the gender approach in regulatory frameworks, public policies, programs, services, and budgets.

4.2 Move towards a life free of gender-based violence, including in emergencies, crises, and disasters.
